

2014 CPT PROGENY

CLASSING – TOP / FLOCK / CULL GRADES

The classers were asked to class the progeny against the following breeding objective:

The aim is to produce an animal that optimises returns from wool and meat in non-traditional merino growing areas. More specifically, the goal is to select sheep of sound conformation with wool of sufficient quality and quantity, and that can produce a valuable carcass. The ewes should be capable of rearing multiple lambs to good weaning weights.

SIRE	TOP (CLASSER ONE)	FLOCK (CLASSER ONE)	CULL (CLASSER ONE)	TOP (CLASSER TWO)	FLOCK (CLASSER TWO)	CULL (CLASSER TWO)
