Please remember the data for an individual sire does not reflect the performance of an entire stud or ram breeder. These figures are averages of the raw data and have not been adjusted to take into account the effect of birth type or management. The traits are measured using the 'Visual Sheep Scores' guide produced by Australian Wool Innovation Limited (AWI) and Meat & Livestock Australia. You can access this guide on the AWI website – <https://www.wool.com/globalassets/wool/sheep/welfare/breech-flystrike/breeding-for-breech-strike-resistance/visual-sheep-scores-producer-version-2019.pdf>.
